<b>Who Is This Book For?</b> .....	<b>1</b>
Use of this book as courseware .....	1
<b>Contents</b> .....	<b>5</b>
<b>How to Use This Book</b> .....	<b>11</b>
Feedback.....	11
Downloading the sample files.....	11
Only one file is essential.....	11
Session and lesson files.....	11
Problem resolution.....	11
<b>Typographical Conventions Used In This Guide</b> .....	<b>12</b>
Use of American English.....	13
<b>Putting the Smart Method to Work</b> .....	<b>14</b>
Access version and service pack.....	14
Sessions and lessons.....	14
First page of a session.....	15
Every lesson is presented on two facing pages.....	16
Learning by participation.....	17
<b>Session One: The Sample Database</b> .....	<b>19</b>
Session Objectives.....	19
Lesson 1-1: Understand the sample database .....	20
Lesson 1-2: Create lookup fields.....	22
Lesson 1-3: Create a concatenated lookup field .....	24
Lesson 1-4: Create one-to-many table relationships.....	26
Lesson 1-5: Create a many-to-many table relationship.....	28
Lesson 1-6: Set default and required values.....	30
Lesson 1-7: Create a general-purpose query.....	32
Lesson 1-8: Create the prototype main form using a wizard .....	34
Lesson 1-9: Improve the prototype form for keyboard input.....	36
Lesson 1-10: Create a simple report using a wizard .....	38
Session 1: Exercise .....	41
Session 1: Exercise answers.....	43
<b>Session Two: Adding Advanced Features Using Wizards</b> .....	<b>45</b>
Session Objectives.....	45
Lesson 2-1: Add a switchboard to the application using the Switchboard Wizard .....	46
Lesson 2-2: Add a command button to a form using a wizard .....	48

Lesson 2-3: Add a comboboxlookup feature to a form using a wizard .....	50
Session 2: Exercise .....	53
Session 2: Exercise answers.....	55
<b>Session Three: The Object-Oriented Paradigm .....</b>	<b>57</b>
Session Objectives.....	57
Lesson 3-1: Understand properties.....	58
What are properties?.....	58
Objects contain objects.....	59
How properties are set for controls.....	59
Lesson 3-2: Understand methods.....	60
What are methods?.....	60
Methods may be modified by arguments.....	60
Examples of methods available in Access objects.....	61
Lesson 3-3: Understand events.....	62
What are events?.....	62
Lesson 3-4 Understand the Access object model.....	64
About object hierarchies.....	64
The Car object model.....	64
The Access object model.....	65
Microsoft's object model diagram .....	65
Session 3: Exercise .....	67
Session 3: Exercise answers.....	69
<b>Session Four: An Introduction To VBA .....</b>	<b>71</b>
Session Objectives.....	71
Lesson 4-1: Understand subs.....	72
Defining procedures in VBA code .....	72
Calling procedures in VBA code.....	72
Lesson 4-2: Step through code .....	74
Lesson 4-3: Understand step over and step out.....	76
Lesson 4-4 Understand variables.....	78
What are variables?.....	78
Lesson 4-5 Use the immediate window to view and change variable contents.....	80
Lesson 4-6 Use the locals window to view and change variable contents.....	82
Session 4 Exercise .....	85
Session 4 Exercise answers.....	87
<b>Session Five: Professional Grade VBA .....</b>	<b>89</b>
Session Objectives.....	89
Lesson 5-1: Understand data types.....	90
String .....	91

Currency.....	91
Boolean.....	91
Date.....	91
Double.....	91
Integer/Long Integer.....	91
Variant.....	91
Lesson 5-2: Understand and implement strong typing and explicit variable declaration.....	92
Lesson 5-3: Understand arguments.....	94
Lesson 5-4: Understand functions.....	96
Lesson 5-5: Understand ByVal and ByRef argument types.....	98
Lesson 5-6: Set and retrieve form control values from within VBA.....	100
Lesson 5-7: Understand scope.....	102
Lesson 5-8: Implement error handling.....	104
Lesson 5-9: Use the help system and the object browser.....	106
Getting help using the Visual Basic help system.....	106
Getting help using the Object Browser.....	106
Session 5: Exercise.....	109
Session 5: Exercise answers.....	111
<b>Session Six: Improving Wizard-Generated Code.....</b>	<b>113</b>
Session Objectives.....	113
Lesson 6-1: Understand and improve the command button wizard's error handling code.....	114
Lesson 6-2: Understand the DoCmd object and its DoMenuItem method.....	116
Lesson 6-3: Implement the DoCmd object's RunCommand method.....	118
Lesson 6-4: Replace standard warnings and error messages with custom dialogs.....	120
Lesson 6-5: Understand the combo box wizard code.....	122
Lesson 6-6: Improve the combo box wizard code.....	124
Lesson 6-7: Correctly name controls.....	126
Lesson 6-8: Program an add record button.....	128
Lesson 6-9: Handle the Form object's Current event.....	130
Lesson 6-10: The Access object model revisited.....	132
DAO (Data Access Objects).....	132
Session 6 Exercise.....	133
Session 6 Exercise answers.....	135
<b>Session Seven: Speeding up Data Entry.....</b>	<b>137</b>
Session Objectives.....	137
Lesson 7-1: Filter using Filter by Form.....	138
Lesson 7-2: Add an option group control.....	140
Lesson 7-3: Implement the option group control's functionality.....	142
Lesson 7-4: Add interactive help.....	144

Lesson 7-5: Add a shortcut hotkey to a control.....	146
Session 7: Exercise.....	149
Session 7: Exercise answers.....	151
<b>Session Eight: Implementing A Popup Browse Form.....</b>	<b>153</b>
Session Objectives.....	153
Lesson 8-1: Create a browse form using a list box control.....	154
Lesson 8-2: Convert a form to a dialog box.....	156
Lesson 8-3: Use the recordset object's Find First and Clone method and Bookmark property.....	158
Lesson 8-4 Launch the popup form from the main form.....	160
Session 8: Exercise.....	163
Session 8: Exercise answers.....	165
<b>Session Nine: Maintaining Static Data.....</b>	<b>167</b>
Session Objectives.....	167
Lesson 9-1: Create a self updating bound combo box.....	168
Lesson 9-2: Make the combo box accept apostrophes.....	170
Lesson 9-3: Create and use a global constant.....	172
Lesson 9-4 Create a popup dialog to update related data.....	174
Lesson 9-5 Add a command button to invoke the Add Director form.....	176
Lesson 9-6 Improve the code to auto-select the contents of the combo box.....	178
Lesson 9-7: Add simple formsto maintain static data.....	180
Session 9: Exercise.....	183
Session 9: Exercise answers.....	185
<b>Session Ten: Validations and Sub-Forms.....</b>	<b>187</b>
Session Objectives.....	187
Lesson 10-1: Add an advisory validation.....	188
Lesson 10-2: Add a VBA business rule to a form.....	190
Lesson 10-3: Design a query for the many-to-many subform.....	192
Lesson 10-4 Create the many-to-many subform.....	194
Lesson 10-5: Convert the combo box to self-updating.....	196
Lesson 10-6 Add a sub form.....	198
Session 10: Exercise.....	201
Session 10: Exercise answers.....	203
<b>Session Eleven: Creating a Dialog-Driven Report.....</b>	<b>205</b>
Session Objectives.....	205
Lesson 11-1: Design a query for the report.....	206
Lesson 11-2: Create the prototype report.....	208
Lesson 11-3: Format the prototype report – first fix.....	210
Lesson 11-4 Format the prototype report – second fix.....	212

Sam ple report Design View .....	214
Sam ple report Print Preview view .....	215
Lesson 11-5: Design the tab based user interface .....	216
Lesson 11-6 Complete the user interface .....	218
Lesson 11-7: Im plem ent Print Preview functionality.....	220
Lesson 11-8: Im plem ent Print functionality.....	222
Session 11: Exercise .....	225
Session 11: Exercise answers.....	227
<b>Session Twelve: Using Word with Access .....</b>	<b>229</b>
Session Objectives.....	229
Lesson 12-1: Create a Word document template .....	230
Lesson 12-2: Create a command button that will open Word .....	232
Lesson 12-3: Transfer data from Access to Word .....	234
Session 12: Exercise .....	237
Session 12: Exercise answers.....	239
<b>Session Thirteen: Adding Switchboards, Menus and Toolbars .....</b>	<b>241</b>
Session Objectives.....	241
Lesson 13-1: Create the user interface .....	242
Lesson 13-2: Create a custom global menu.....	244
Lesson 13-3: Add standard top-level menus and items.....	246
Lesson 13-4: Add a custom top-level menu and items.....	248
Lesson 13-5: Create a custom toolbar.....	250
Session 13: Exercise .....	253
Session 13: Exercise Answers.....	255
<b>Session Fourteen: Finalizing The Application For Deployment .....</b>	<b>257</b>
Session Objectives.....	257
Lesson 14-1: Im plem ent universal error handling .....	258
Lesson 14-2: Explicitly declare and destroy objects.....	260
Lesson 14-3: Im prove form appearance .....	262
Lesson 14-4: Further im prove form appearance.....	264
Lesson 14-5: Setting startup options.....	266
Lesson 14-6 Test the application.....	268
Session 14: Exercise .....	271
Session 14: Exercise answers.....	273
<b>Appendix A: The Rules.....</b>	<b>275</b>
1: General rules.....	276
2: Table and Field nam ing.....	280
3: Field properties.....	281

---

4 Access object naming .....	282
5: Form control naming.....	282
6 Variable naming .....	283
7: Constants.....	284
8: Variable declaration .....	284
9: Error handling .....	285
10: Object destruction.....	285
<b>Appendix B: Useful Links .....</b>	<b>287</b>
Useful web site links.....	288
<b>Index .....</b>	<b>289</b>
